Summary

Great for History Maker Golf, Baseball, Football, and other sports

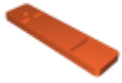

[Toys & Games](#) > [Board Games](#)

I print these in PLA with 0.3mm layer height and 15% infill. No supports are needed if you print the tray top top-down.

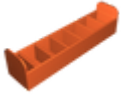

The tray has space for 12 tiles of each type plus another 12 of the 1|2 tile. That's enough for 12 golfers to all be tied at -11. You can also print a smaller set for two teams of digital digit scores such as football and baseball. A smaller storage tray is included.

I recommend printing these tiles in two colors. The top two layers of each tile should be a different color than the bottom layers. If your slicer software support "ironing" I highly recommend ironing the top layer. I particularly like the look of using a "stone" or "speckled" filament for the top layer.
