An adapter for the ISDT BattGo to supply power from a usb-c battery bank.

Requires a "PD trigger module" to tell the supply to send 20v. Also an XT60.

The trigger module I used : https://www.amazon.com/dp/B09MK4RT5Y?psc=1&ref=ppx_yo2_dt_b_product_details

Plug and usb-c port are press fit and wired to each other. Back is glued on.

Check your polarity!!
