Summary

Our collection of housetiles is slowly growing with these outer wood walls.

[tabletopterrain](#) [dungeontiles](#) [hexagons](#) [dndterrain](#)
[rpgterrain](#) [hextiles](#) [wdhex](#)

In addition to the wood walls with the wooden floors, we made some walls to go on the outside of the house. There is a wooden floor on the inside-part, and cobblestones on the outside-part.

The corner-tiles for the wood outer walls are still being made, we hope to have them finished some time soon.

These wood floors come in 2 patterns, with the beam-ends connecting either straight (floor-S) or diagonal (floor-D) to a hexagon-side. This way the wood floor can be laid out in any direction you want.

Our hex-tiles go together with the baseplates and the other housetiles we made:

[baseplates](#)

[wood floor tiles](#)

[cobblestone street tiles](#)

wood floor tiles with walls

wood floor tiles with walls - corners

We made more WDhextiles, just check my profile for those!

Our tiles are made for about 32mm scale, but we made them a bit larger (gloomhaven size-ish) because the baseplates of our 28-32mm sized medium creature mini's did not fit between the walls in a small alley.
