Updated to avoid potential infringement with patent application US 20220118600 A1

Hook-style wall mount for small to medium chainsaws. I'm using it for the Dewalt Flexvolt 16" Cordless Chainsaw.

Print with a large layer height and relatively dense infill (at least 50%) for strength. Mine is printed in black and yellow, which looks pretty cool but is really just because I ran out of black PETG.

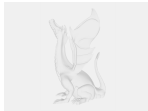

The screw holes are 5mm in diameter to accept either a drywall screw or the slightly larger screw commonly found in self-drilling drywall anchors. Quality drywall anchors will be more than plenty to hold even a very large chainsaw.
