Summary

Combined the models from prusa and auroratechchannel, got this monstrosity.

Prusa'nın Shelf Phone Stand modelini ve **auroratechchannel'in** Tripod Phone mount modellerini bir araya getirerek, daha dayanıklı bir telefon tutucu elde ettik. Prusa'nın orjinal modeli şahane olsa da, ince parçalar çok olduğu için 3 kez kırıldı. Bundan dolayı daha kalın bir model ile birleştirildi ve baskı alacak parça sayısı az olduğu için, kırılma ihtimali de azaldı.

We combined Prusa's **Shelf Phone Stand** model with auroratechchannel's **Tripod Phone Mount** models to create a more durable phone holder.

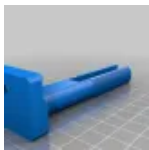

Even though Prusa's original model is awesome, it broke three times because it has a lot of thin parts. So we merged it with a thicker design, and since there are fewer pieces to print, the chance of it breaking is much lower now.
