Description

This is a simple and functional 3D-printed razor holder designed to fit most popular razor types. If needed, it can be easily scaled in your slicer to match your specific razor.Fast and easy to print — only about 15 minutes and ~3 g of filament.A practical bathroom accessory that helps keep things tidy and lets your razor dry properly.

Printing & Assembly Note

I recommend printing the model as shown in the last image, with supports. However, depending on your experience and printer setup, it can also be printed flat without supports.For mounting, I recommend using thick, transparent double-sided tape, like the one shown in one of the images.
