This **cartridge nozzle set** includes three different nozzle designs for **1K cartridges**, allowing clean and controlled application of adhesives and sealants.

The nozzles **screw directly onto the cartridge** and cover a range of use cases — from standard applications to more precise or shaped beads.

Included Variants

- **Standard nozzle** – for general-purpose applications
- **30° nozzle** – ideal for edges and hard-to-reach areas
- **Triangular bead nozzle** – for consistent, well-defined triangular beads

Features

- Compatible with **common 1K cartridges**
- Clean and precise material application
- Reusable design
- Simple and functional geometry
- Easy and fast to print
