Modern Wall Hook with invisible mounting using a 3-4mm screw. Tested in PLA, PETG and Nylon.

Three "top" variants are included: rounded, chamfered and sharp.

Recommended settings: increase walls to 3-4, infill 35%+

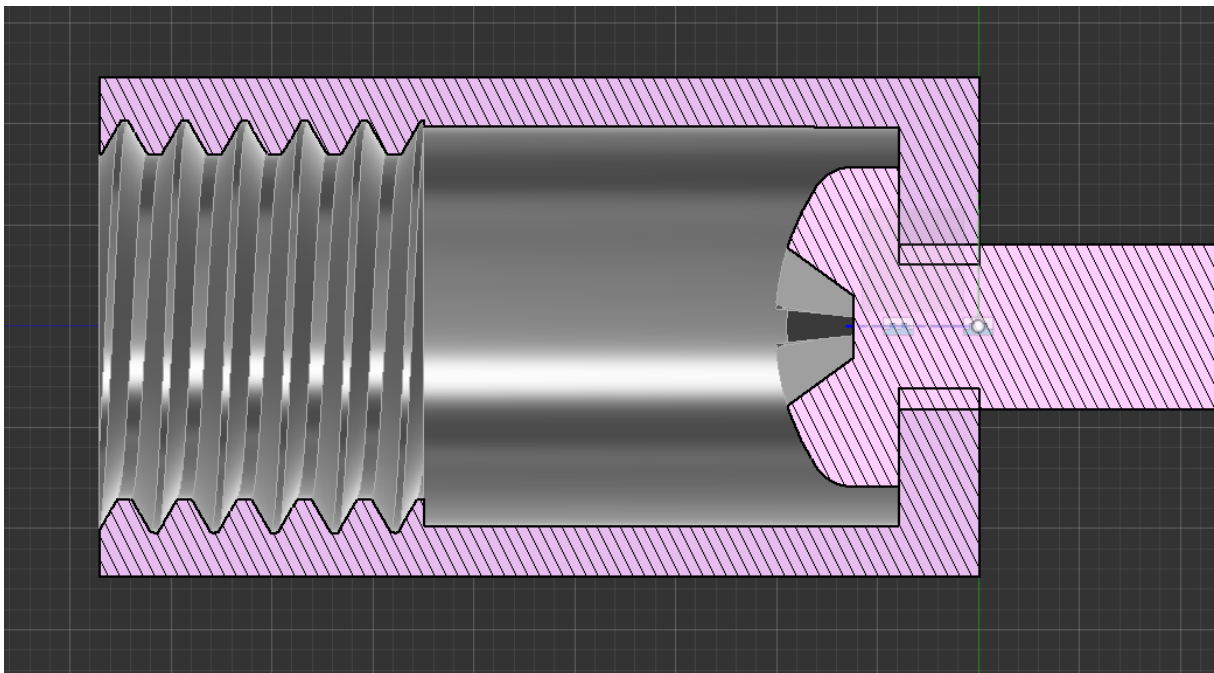

Updated (2026/03/04):

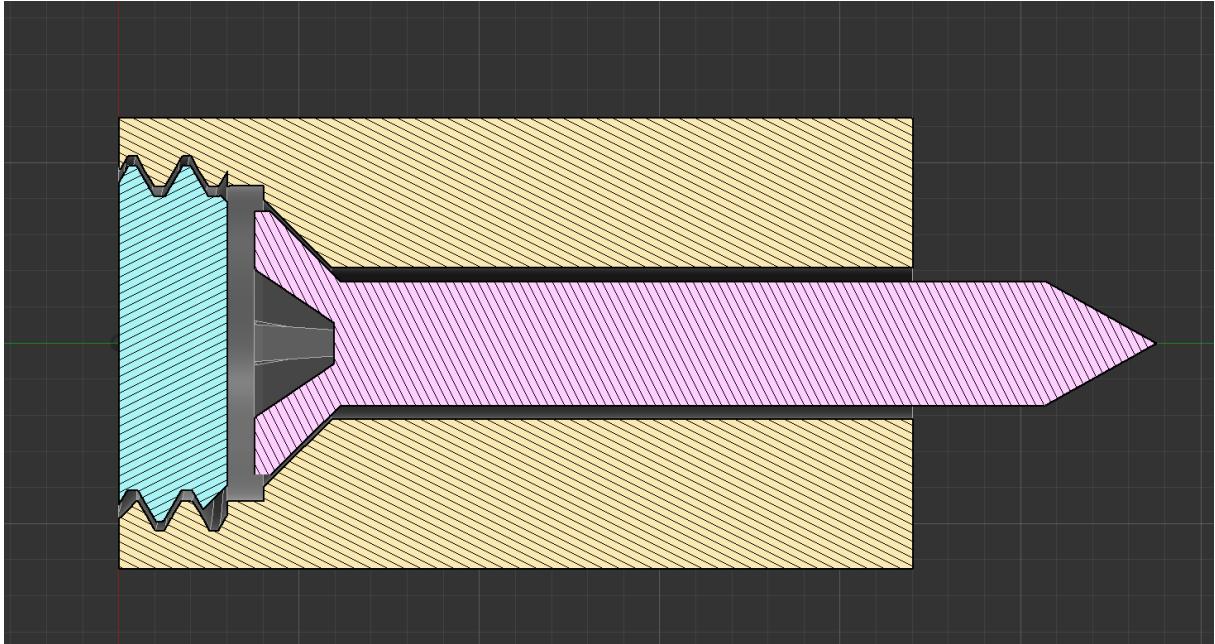

After modeling a new parametric version of this model, I decided to increase the strength of the body. Longer fasteners will need to be used, but the hook should be much sturdier.

There are now also 2 versions of main body based on the used fasteners: countersink or flathead.

Version 1:

Version 2:
