This is a remix of one of the excellent models from mz4250's Fighter Collection. I changed the pose around a bit, added the half cape and helmet tuft (and grabbed the crossbow from another model in this same collection) to make a model for the Gloomhaven City Archer. Big thanks to MZ for making the original model, and extra big thanks to him for uploading the blender files, which made it so easy to customize! I really appreciate all of his excellent contributions to our online community of makers!

I printed mine at .05 mm layer height with a .25 mm nozzle.
