Double-sided Cable Clip Print in place

I'm tired of looking at my collection of cables, tangled all over the drawer. So I modeled such a double-sided Clip.

This version is suitable for smaller USB cables. If you are interested in larger ones, write to me. You can easily enlarge this model, but not too much, so that the tolerance is not loose.

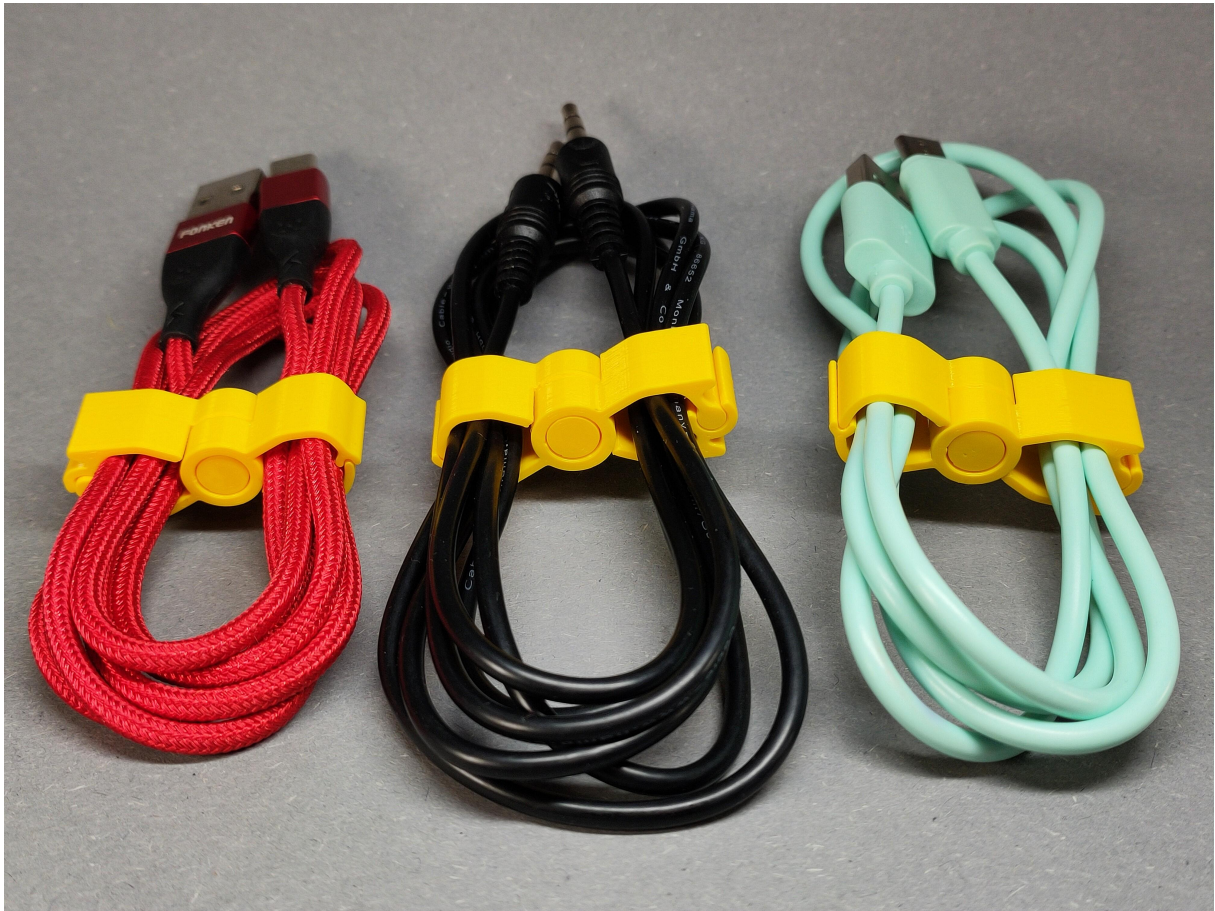

This clip is quite stiff, I made protrusions for opening

The clips look fun when they are open - like little crabs!

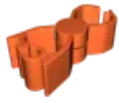

Important update!!Added looser clip model!!
