One minute introductory video for my Bracket for Wall Mountings:

All four sides are tapered so it is easy to slip things on and off. There are holes for two screws/nails, but only using the top one will work unless hanging something that weighs a lot or is top heavy.

I will try and occasionally publish new animal heads/busts that use this bracket for wall mounting. I have several published already, which can be seen in my Animal Busts & Other Wall Mountings Collection.

For Your Designs:

I've also included the removal volume files (both high & low resolution) so you can do a boolean subtraction to easily create a model that hangs on the wall using this bracket.
