Summary

A high detailed Velociraptor head that can easily be mounted on a wall.

The Velociraptor Head is a little more complex to print than many of my other animal heads because the teeth require support. You will probably also want support for the back of the jaw, but this model printed fine for me without support going all the way up to the chin. When slicing this model make sure the teeth are connected to the mouth properly (the model overlaps itself in those locations).

For similar models see my [Collection of Animal Heads/Busts](#) that I have designed or remixed. All of these designs use the same bracket to mount, making them interchangeable.

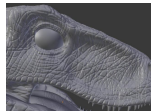

Mounting Options:

- **Bracket for Wall Mountings** - mounts firmly to wall with one screw (use top hole).
- **Modular Stand** - print and press together a stand to put this on a table or desk.
- I've also included a small slot, so this can be hung on a wall with a nail.

One minute introductory video for my Bracket for Wall Mountings:

Enjoy and if you print one please post a make!

This remix is based on

Jurassic Park Velociraptor Head
