Design Concept

The mini bag clips are designed with simplicity and functionality in mind. Their compact structure ensures they are easy to handle and ideal for securely sealing bags of different sizes.

Purposes

These clips can be used to keep your food fresh by sealing chip bags, cereal packages, and any other daily kitchen essentials.

Printing Recommendations

Recommended materials for these mini bag clips include PLA or PETG for durability and food safety. A layer height of 0.2mm is suggested to capture the design smoothly.

Assembly Instructions

No assembly required, simply 3D print and use. Ensure the prongs are flexible yet firm for optimal operation.
