Summary

Build your own church or cathedral for tabletop or wargames.

Tabletop Miniatures > Props & Terrains

Tags: wall terrain stone modular dnd miniature tabletop dungeonsanddragons printinplace building bench cathedral church altar shrine ttrpg dungeonsticks

DungeonStick Church or Cathedral setup.

- Fast prints without support.
- Round DungeonStick connection for maximum flexibility.
- Easy storage
- Use the included couplers to create a symmetrical build.
- Functional doors (print in place). Give them a gentle push when finished printing to pop the doors loose.
- Few extra terrain pieces included (altar/shrine and stone church pew. You can find the central pillar in the link below.

Have fun building your ultimate terrain setup, and don’t forget to post a make of your creations! I’m curious to see how yours turn out.

Everything was printed with ;

PLA, 0.2 layer height, 2 walls, 15% infill, zero supports!

Don’t forget to check out the other models as well.

Pillar/obelisk (scale it to your preferred size); https://www.thingiverse.com/thing:3393318
