Model parameters

Check out my [Patreon](#) or my [Printables club](#) for more awesome models and benefits!

Meet the mini version of the articulated Night Dragon! It is super cute, very easy to print, and doesn't require any support material or post processing. The majestic full size Night Dragon is available right now to all subscribers of the "Member" tier on my Patreon as well as to all members of my Printables club. If you

aren't a subscriber, you can purchase the model files for a small fee on my Patreon store. Get it now and print the entire Night Dragon family!

The multicolor version requires a toolchanger or an automatic filament swap system (MMU, AMS, CFS or similar). It is not possible to print the 2 color version in multiple parts and then assemble it.

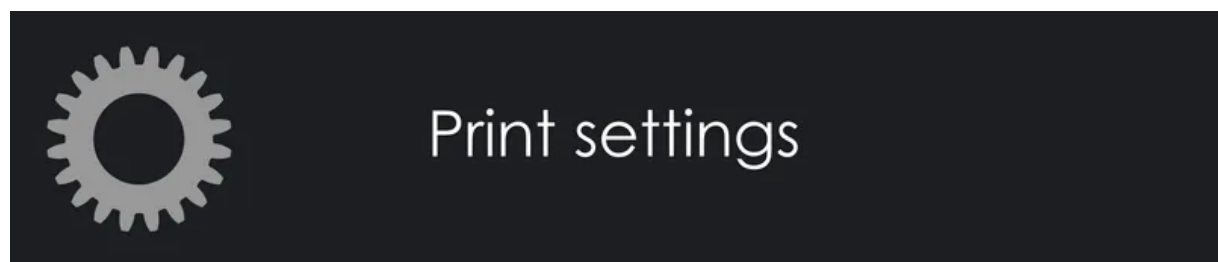

Dimensions (LxWxH)

53 x 120 x 24 mm (100% scale)

2.1 x 4.7 x 1 in (100% scale)

Included Files

I've included two .3mf project files for PrusaSlicer (1 color and 2 colors), as well as a raw .stl file for best compatibility with other slicers. The included file is super easy to multi material paint, so if you're not using a Prusa printer, you can easily import it into a slicer of your choice and have it ready for printing in no time.

Material

PLA

Layer height

0,2 mm

Infill

>15%

Support

None. This model doesn't require any support material.

Scaling

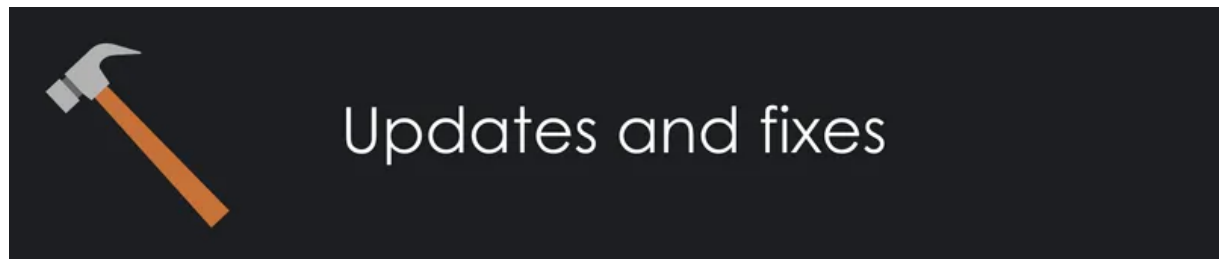

This model is relatively small so scaling it down is not recommended, because the connections might be too weak and fragile at smaller scales.

Orientation

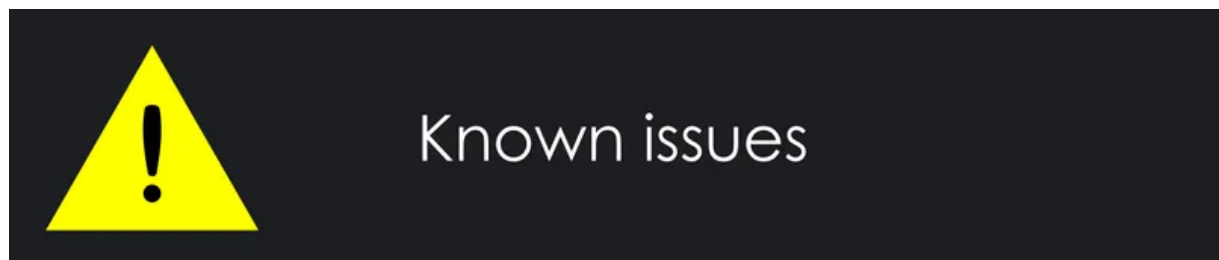

Default, laid flat on the belly

Adhesion aid

Unnecessary, the contact surface with the buildplate should provide sufficient adhesion. However if your print surface suffers from poor adhesion, consider using an adhesive spray, or some other kind of adhesion booster. Using a brim is possible, but not recommended, as it would be too difficult, and inconvenient to remove afterwards.

All resolved issues with the model files and detailed information about their fixes will be listed in this section. If you're having any problems which aren't on this list, please visit the **Known issues** section below. If you don't see your problem mentioned there as well, please leave me a message with more details about your issue, so that I'm able to address it as soon as possible.

There currently aren't any known issues/work in progress. If you run into any, please contact me via dm.

Commercial use

My models are free for personal, non-commercial use. If you want to sell, or monetize them in any other way, please visit my [Patreon](#) or my [Printables Club](#) for more licensing options.
