Summary

A simple phone stand that you always carry on your keychain!

This is a small phone stand that you can simply put on your keychain and always carry with you.

I have created a few different sizes depending on how thick your phone is.

Note: You can achieve a flatter angle of the phone by using a stand with a slightly wider gap.

Edit: I rounded the edges a bit at the top.

If you like check out **my other designs** too!
