No brim or supports required.

A reusable wasp trap attachment designed to screw directly onto a standard bottle like a regular bottle cap.

The trap works by attracting wasps into the bottle using sweet bait such as juice, soda, syrup water, or other sugary liquids. Once inside, the narrowed entrance makes it difficult for the insects to escape.

The design includes an optional threaded hanging hook that can be attached to the top section, allowing the trap to be hung from trees, branches, pergolas, balconies, or garden structures. The hook can also be omitted if the bottle is intended to stand upright on a table or flat surface.
