Stop wasting water on the surface and start nourishing your plants at the source. This innovative root irrigation spike delivers water directly to the root zone, ensuring deep, efficient hydration exactly where your plants need it.

Simply pour water into the top funnel, and the system gradually distributes moisture through precisely placed side openings. This encourages stronger root growth, reduces evaporation, and helps prevent overwatering on the surface.

Perfect for indoor plants, balcony gardens, and outdoor pots, this solution keeps soil evenly moist while saving time and water.
