A simple modular tool organizer for any toolbox. Dividers clip onto 1/4" steel rods (or something similar). The design includes blank dividers and interchangeable labeled dividers.

The labels and clip are designed to be printed on a single-color printer (I don't own a multi-color printer). The labels shown in the images were printed with a layer pause + filament swap. The clips and the labels were glued together.

No supports required. Print dividers and labels flat, and the clips standing. Easy peasy.
