

3D MODEL ONLY

# Tic Tac Toe-Pac Man version

 The 3D Printing Warrant[VIEW IN BROWSER](#)

updated 5. 2. 2023 | published 5. 2. 2023

## Summary

Normal Tic Tac Toe can be boring. This one is PacMan themed and fits in an Altoids Tin.

Inspiration for this build came from <https://www.thingiverse.com/thing:2994235>

This is designed so that you can play anywhere. When you're ready to play, you just open up the Altoids tin and begin your game. Also added a small set of tweezers in case you have trouble picking up the pieces. Everything fits inside an Altoids tin.

All you need to print this is:

- 1x Board
- 1x Tweezer
- 9x power pellets
- 5x PacMan
- 5x Ghost

- (Ghost can be all one color or like the original game. Maybe even glow-in-the-dark filament)

I glue the game board in the Altoids tin along with the power pellets. Power pellets are a tight fit so you might need to do some light sanding. It can also work without them.

I made all this with a standard Prusa slicer.

Need a rack/storage for all those Altoids tins? Try this out! <https://www.printables.com/model/203167-12-altoids-tin-storage/files>
