Meet the articulated lizard!

This flexi reptile features a clean, scale-free design that is absolutely perfect for showing off your favorite Silk, Dual-Color, or shiny filaments.

Features

- ⚙️ 100% Print in Place: No assembly required.
- ⚙️ Support-Free: Just slice and print!
- ⚙️ Smooth Design
- ⚙️ Perfect Fidget: Articulated joints move smoothly

⚙️ Printing Tips:

⚙️ Layer height: 0.2mm (or lower for an even smoother finish).

⚙️ Infill: 5% is plenty.

⚙️ Brims/Rafts: Not required

3 Ready-to-Print Profiles Included: I've prepared three different print profiles so you can choose the best option for your setup:

1. **Profile 1: Full Color (AMS)**
2. **Profile 2: BOTTOM (AMS)** – A great compromise! Saves time and filament purges, but still gives the lizard plenty of character.
3. **Profile 3: Single Color** – The classic option. Super fast, no AMS required.
