**Hey everyone! 🐾**

I'm so excited to share my newest design with you all — this adorable **Cute Flexi Samoyed Keychain and Magnet Collection!** ✨ Known as the "smiling cloud dogs," Samoyeds have always been one of my favorite fluffy breeds, and I wanted to capture their cheerful personality in a cute little articulated companion. With their fluffy face, happy smile, tiny pink ears, little paw pads, and chubby proportions, these little pups are ready to melt hearts!

The body is fully articulated and print-in-place, making it incredibly satisfying to wiggle and fidget with.

They're perfect as desk buddies, keychains, magnets, gifts, or simply as another fluffy addition to your growing **Fluffy Tails** collection!

### **What's Included**

- Cute Samoyed design with an adorable smiling personality
- Fully articulated print-in-place body
- Signature rounded fluffy tail
- Keychain-ready design so your Samoyed can travel with you everywhere
- Magnet version included for decorating refrigerators, lockers, and workspaces
- Multi-color friendly design for realistic Samoyed colors or your own creative combinations

The model is optimized for easy printing on most FDM printers and prints without supports.

## IMPORTANT: Printing Notes

- Please clean the build plate with soap and water or IPA before printing
- No supports needed
- Use brims if you experience adhesion issues.
- **In the .3mf file, the layer height is adjusted for clear print.**
- Keychain loop and magnet hole size can be adjusted or repositioned if desired (in the .3mf file)
- .3mf file created using Bambu Studio
- Recommended model size : **125 mm** .
- Magnet hole provided is of size 8.4 x 8.4 x 3.2 mm for a magnet of size 8 x 3 mm. Tolerance might need to be adjusted depending on filament used
- Material used: PLA+
- Printer settings: 0.2 mm layer height, 2 walls, 15% infill
- **To avoid dark filament bleeding**, the filament purge needs to be adjusted accordingly (multiplier at 1.2 - 1.3 or just increase the purge value from dark to light color to 1.3x and multiplier remains 1). **In the .3mf file purge value is already adjusted for the given colors.**
- The .stl file do not contain magnet hole. A negative cylinder can be added in the slicer if needed
- If you get any non-manifold warnings in your slicer, feel free to ignore them — the model prints perfectly fine

## Files Included

- Flexi Samoyed Toy (Rounded Fluffy Tail)
- Samoyed Keychain
- Samoyed Magnet
- Multi-color Ready Files
- STL + 3MF Files

Thank you all so much for supporting my work! ♥ Your support allows me to continue creating fun, cute, and unique articulated animals like these.

If you print one—I'd absolutely love to see your makes. Share your photos in the community and let everyone know which tail is your favorite!

Seeing your prints and all the creative color combinations is always one of the best parts of every release.

**Happy printing!** 🐾
