Summary

Minimalist hook that holds with hidden screws, easy to install and to print, originally designed for motorcycle helmets

I made this hook for a friend that needed to expose a motorcycle helmet, so i tried a new designing pipeline and i got to make this dope hook that you should definitely use and share.

For the screws to be hidden, it can be tricky to do the angle so use a flexible or long drill bit and you can make it flush.

Feel free to ask for remakes or if you're curious about my designs or licensing.
