Summary

Are you bored by the simple look of the basic monopoly game? This set contains upgrade pieces to make your game special.

The set is made as an upgrade for the standard monopoly game. It contains 4 game pieces along with 3 different types of houses and 6 different hotels. These are based on the buildings located in the city of Prague (Czech republic). The game pieces represent four different types of public transport vehicles - a normal tram, a historical tram, a subway car and a bus. These can be printed with color changes to achieve a prototypical paint scheme. I recommend a higher layer resolution (at least 0.1mm). The houses are designed to be printed in larger batches (11 pieces - the standard monopoly game comes with 32 houses, this way you will have 33). Because of this, they have a small amount of detail, and they can be printed with a higher layer height. I recommend to implement a color change to make the roofs green, so you can still recognize them as a normal house and don´t mistake them for a hotel. The hotels are represented by 6 different famous or important buildings in Prague, like for example Prusa lab or the Municipal house. A color change was implemented here as well to make them recognizable as hotels (the roofs

are now red). I hope you will have a good time making these and a even better time playing the finished game.
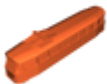

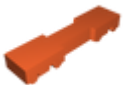

Print instructions

t3_tram, Old_tram, Subway, Bus: print at 0.1 mm layer height or lower, as the models contain a large amount of small details. A brim may also be needed.
Houses (1,2,3): Print at up to 0.2 mm layer height. If you print in larger quantities, a brim will be (almost certainly) required.

Hotels (Dancing house, Municipal house, Prusa lab, Faculty of law, Kotva shopping centre, National theatre): Print at up to 0.2mm layer height, if printed as one large batch, a brim could be required.

All of the items are designed to be printed with a 0.4mm nozzle.
