Add a practical hanging point to the back of the seat and make better use of the luggage compartment.

This 3D-printable fold-out hook provides a convenient place to hang lightweight everyday items such as shopping bags, small accessories or other belongings you want to keep organised and within easy reach. When not in use, the hook folds away neatly to keep the luggage area clear and unobstructed.

A compact solution that adds extra functionality exactly where you need it – **Simply Clever**.

Škoda Auto a.s. makes the digital manufacturing files available exclusively for personal and non-commercial use.

Any commercial sale or distribution of items produced from these files is prohibited without the prior written consent of Škoda Auto.

The files are provided on an “as is” basis, without any warranty as to their suitability for a particular purpose. The user is responsible for correctly setting the manufacturing parameters, selecting the appropriate material, carrying out the assembly, and verifying the safety of the finished item.

Škoda Auto reserves the right to modify, update, or withdraw the files at any time.

Recommended material:

For best results, print the inserts from **ASA or another heat-resistant material.** The interior of a parked vehicle can get very hot, which may cause materials such as PLA to soften or deform. If you don't have an enclosed printer, PETG is recommended as a practical alternative.
