Veyr Dustjackal Rover is a fast armored patrol vehicle of the **Veyr Compact**, designed to cross ruined industrial zones, exposed frontier roads, and the hostile wastelands surrounding isolated settlements. Combining mobility, protection, advanced sensors, and compact firepower, the Dustjackal gives Veyr forces the ability to scout ahead of infantry formations and respond rapidly to threats beyond fortified positions.

Since the **Great Collapse** shattered the Vorrakai Gate network, countless Compact settlements have been forced to defend enormous territories with limited manpower. Dustjackal Rovers patrol the spaces between those strongholds, escort supply columns, investigate lost signals, and hunt threats before they can reach populated sectors. Their sensor systems are particularly valuable in territories affected by **Echo**, where conventional reconnaissance can quickly become unreliable.

Perfect for:

- Sci-fi tabletop armies and skirmish forces
- Reconnaissance and rapid-response units
- Armored patrol and convoy scenarios
- Frontier colony and military outpost collections
- Vehicle painting and display projects

Model features:

- **Veyr Compact** armored reconnaissance vehicle
- Rugged four-wheel patrol configuration
- Reinforced futuristic armored hull
- Roof-mounted sensor and surveillance equipment
- Compact defensive weapon system
- Strong, chunky silhouette designed for tabletop readability
- Detailed futuristic vehicle design

Available scales (model height without base):

- **32 mm** – 44 mm tall
- **54 mm** – 74 mm tall
- **75 mm** – 103 mm tall
- **90 mm** – 124 mm tall
- **120 mm** – 165 mm tall
- **1:10 scale** – 220 mm tall

What’s included:

- STL files in **6 scales**
- Unsupported STL files
- Format: **STL**

Printing recommendation:

- **Resin:** Recommended for maximum definition of the sensors, wheel details, armor panels, and smaller mechanical elements.
- **FDM:** Well suited to FDM printing thanks to the rover’s broad armored surfaces and chunky vehicle silhouette. A **0.4 mm nozzle** or smaller is recommended for retaining the finer mechanical details.

- **Supports: Organic supports required** for significant overhangs, particularly around the chassis, wheel areas, weapon system, and sensor equipment.
- **Orientation:** Position the model to keep the main armored hull surfaces as clean as possible and place support contact points primarily on less visible underside areas.

Part of **Vorrakai Frontiers – Season I**.
