This is a portable container for adhesive bandages with a snapping lid. The inside dimensions are 17×32×90 mm.
It’s compact and easy to carry, making it great for outdoor activities, hiking, camping, travel, or keeping in your car (don't use PLA if you intend to keep in your car), backpack, or first-aid kit.
It was brought to my attention that a red cross over a white background is a protected emblem under the Geneva Conventions, I therefore recommend printing it with other colors.

This 3MF was created with the Elegoo Centauri Carbon 2 profile in Elegoo Slicer (OrcaSlicer). If you're using a different printer or slicer, import the 3MF as a model only to avoid incompatible printer settings.
