Hi. I’d like to introduce you to my new project: a portable shower you can take with you wherever you go. It’s a really useful item for any trip. The shower fits standard bottles and includes an additional adapter for 5L bottles.
The model shown in the photo is an older version without a detachable bottom, so please treat it as illustrative only.
I recommend printing using a rigid filament, such as PLA+ or ABS. Please use high-precision print settings, as the valve's seal depends on it.

Enjoy and Stay clean :)
