Meet the **Mini Flexi Capybara!**

This little capybara was designed to be **cute, chunky, compact, and fun to pose**. Its articulated body gives it a satisfying wiggle, while the **separately printed rotating head** adds even more personality.

The head simply attaches to the body after printing and can be **turned from side to side**, letting you give your capybara different poses and expressions.

Features

- Cute stylized **Mini Capybara**
- **Articulated flexi body**
- ↔ **Rotating and poseable head**
- Head prints separately and attaches after printing
- Designed for **FDM 3D printing**
- **No supports required**
- ✂ Small and quick to print
- Great for single-color or multicolor printing
- Perfect for experimenting with different capybara color combinations

Recommended Print Settings

- **Layer Height:** 0.15 mm
- **Infill:** 10-15%
- **Walls:** 2
- **Supports:** Not required
- **Material:** PLA recommended
- **Nozzle:** 0.4 mm

The **body prints articulated in place**, while the head prints separately. After printing, simply attach the head to the body and it will remain rotatable for easy posing.

If you print one, **share your make!** I'd love to see your little capybara and the colors you choose.

Happy printing!
