Use tree supports on build plate only (for mug holder, not screw).

The **Clamp-On Cup Holder** is a practical holder designed to keep your mug, cup, or glass safely off the main surface of your desk or table.

It attaches directly to the edge of a tabletop using an integrated screw clamp. Keeping your drink in a dedicated holder helps reduce the risk of

accidentally knocking it over while working, gaming, crafting, or using your computer.

The open side allows mugs with handles to fit comfortably while still keeping the cup securely surrounded.
