A X-wing model inspired by the iconic Rebel starfighter. This model is designed to look great on display, whether it is sitting on a desk, held in your hand, or held by a string to look like its flying.

The detailed shape and distinctive wings make it instantly recognisable, while the visible 3D-printed texture gives it an authentic handmade look. It's a fun project for Star Wars fans, model builders, and anyone who enjoys displaying their prints. Its even got a droid in the droid port!

Print it, and let your X-wing take off!
