Bring a little warmth and old-fashioned charm into your home with this **Miniature Tile Stove** — a tiny fireplace designed to create a cozy atmosphere using an electric LED candle.

At only around **13 cm tall**, this little stove may be small, but it brings a surprising amount of character. Place an LED candle inside, turn off the lights and watch the warm glow dance through the fireplace. Add the included wooden logs and suddenly you have a miniature scene that feels like a tiny winter evening captured in 3D print.

And the details don't stop there.

The set includes not only the **tile stove**, but also a **wood basket filled with firewood** and a **fire poker**, giving the whole scene that extra touch of realism. The wooden logs are designed as decorative elements that make the glowing fireplace look even more alive.

Designed for electric/LED candles
No real flame required
Decorative firewood included
Wood basket included
Fire poker included
Approximately 13 cm tall
Each model is printed separately - no AMS required

♥ Create a tiny world of warmth

Imagine it sitting on a shelf, desk, cabinet or next to your Christmas decorations. A soft LED glow, little pieces of wood waiting by the stove, and a tiny poker leaning nearby.

It isn't just another 3D print.

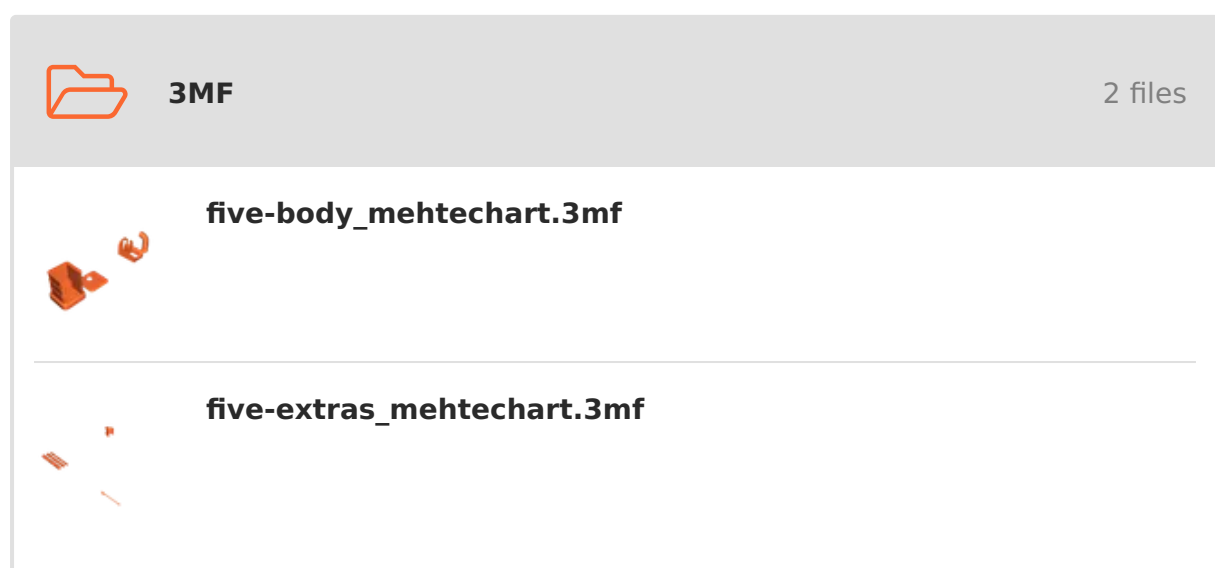

It's a **little piece of cozy atmosphere.**

Perfect for miniature displays, winter decorations, dioramas, dollhouse scenes, Christmas setups or simply for anyone who loves the feeling of a warm fireplace on a cold evening.

Print it. Add an LED candle. Turn down the lights. Enjoy the atmosphere.

Note: Use only suitable electric/LED candles. Do not use real candles or open flames with the printed model.
