😸 WallArt – Cat – Power Outlet – Light Switch

Give your power outlets and light switches a fun new look with this cute cat WallArt!

This playful design makes it look like a curious little cat is interacting with your outlet or light switch, turning an ordinary part of your wall into a charming decoration.

Perfect for bedrooms, living rooms, hallways, offices, kids' rooms, or anywhere a little cat deserves a place on the wall.

You can position the model around a **power outlet or light switch** depending on your setup and preferred look.

The silhouette design looks fantastic in classic black, but of course you can print it in any color to match your wall and interior.

Printing

The model is designed for easy flat printing.

- 2 walls
- 100% rectilinear infill
- No supports required

Make sure your build plate is clean and has good adhesion before printing.

Mounting

I recommend using small pieces of **double-sided adhesive tape** to securely attach the WallArt to the wall. This allows you to position the cat exactly where you want it without drilling or screws.

If you print it, I would love to see your make! ❤

Happy printing! 😸
