Description

Keyboard stand, with an optimal ergonomic angle design, very comfortable for long-term use without wrist pain.

Keyboard Stand with Upright Mode — Significantly Saves Desk Space

Dual-Mode Keyboard Stand (Vertical & Horizontal)

Seesaw-Style Lever Design — Easily Prop Up the Stand with Just a Gentle Press of a Finger

Features optional **5x2mm magnet slots** Printed parts naturally provide enough friction, so magnets usually aren't needed right away. If the joint loosens from frequent use over time, you can always add magnets later for extra stability.
