Summary

Don't have multi color printer and wanted my dell power supply 750W end protector give some colorfulness.

No multi-colour printer here, but I wanted my HP 750W power supply fascia/end protector to have a bit of colour.

I printed the **+** in red and the **−** in black, held in place with two drops of CA glue. Now the power supply has a great-looking fascia.

Complementary parts

Power supply cover/fascia — by negatv Licensed under CC BY 4.0 · unmodified redistribution Original model: https://www.thingiverse.com/thing:3477577

+/- addon — is my own design

Both files are included for convenience. The power supply cover remains negatv's work; the fan holder is my own.

I have printed them all in 25% infill
