updated 20. 9. 2026 | published 20. 9. 2026

## Summary

Cratered lunar tray with a tiny astronaut and a tealight well. Print-ready 3MF included.

[Household](#) > [Home Decor](#)

A slice of lunar surface with craters, ridges and dust ripples across the top, a small astronaut figure standing near the edge, and a recessed well sized for a standard tealight. With a candle in it the crater walls throw long shadows across the tray, which is the whole point of the piece.

It works as a desk or shelf centrepiece, and the tray around the well is wide enough to park rings, coins or a watch overnight.

### Print settings

- Layer height: 0.2 mm
- Infill: 7%
- Supports: tree (auto)
- Nozzle: 0.4 mm
- Material: PLA
- Sliced for Bambu Lab A1 mini

The included 3MF is sliced and ready to print. Light grey shows the crater detail best. PLA softens with heat, so use an LED tealight if it will be left burning.
