Summary

Moon colony desk organizer with domes, craters and compartments for pens and clutter. Print-ready 3MF.

[Household](#) > [Office](#)

A miniature lunar colony that works as a desk organizer. Domed habitat modules sit on a cratered base, with the domes hollowed into compartments and a deeper well among them for pens, pencils and brushes. Smaller craters around the edge take paperclips, SD cards, coins and the other small things that end up loose on a desk.

Everything prints as a single piece, so there is nothing to glue or assemble, and the wide cratered base keeps it stable when you pull a pen out.

Print settings

- Layer height: 0.2 mm
- Infill: 7%
- Supports: tree (auto)
- Nozzle: 0.4 mm
- Material: PLA
- Sliced for Bambu Lab A1

The included 3MF is sliced and ready to print. Light grey or bone white gives the best lunar look and shows off the crater texture.
