Summary

Tactile drumpad overlay for Ableton Note. Flexible TPU sticks to screen without adhesive allows drumming without looking

Hobby & Makers > Music

Tags: music tpu ableton musicproduction

I made this flexible TPU drumpad overlay to bring back some of the tactile feeling of actual drum pads on a touch screen.

It sticks easily to your phone and gives just enough feedback to play without looking down. I'm also exploring if something more like an actual drumpad can be made.

This is currently sized for iPhone 12 Pro, if there's interest I can create versions for other iPhone models as well!

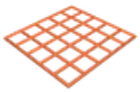

Print Instructions

Print with TPU, adjust height based on preference.
