WallArt - World Map Hexagon 12 pcs

Bring the spirit of travel and exploration to your wall with this unique 12-piece World Map Hexagon WallArt. ✈

The complete artwork consists of 12 individual hexagonal pieces that come together to create a large geometric world map.

Different continents are distributed across the hexagons, while one section features a compass rose. The modular honeycomb layout gives the classic world map theme a modern and distinctive appearance.

Because the design consists of separate pieces, you can arrange the hexagons precisely on your wall and create an impressive large-scale centerpiece.

Perfect for living rooms, offices, gaming rooms, travel-themed spaces, bedrooms or anywhere you want to celebrate traveling, geography and adventure.

Black PLA creates a strong contrast on bright walls, but colors such as dark gray, bronze, gold, silver or wood-effect filament can also look fantastic.

PRINTING

My preferred settings for this WallArt are:

Layer height: 0.28 mm

Walls: 2

Infill: 15%

Supports: No

I prefer a 0.28 mm layer height for my WallArt models because the visible front surface is the most important part of the finished piece.

This provides a great balance between appearance and printing time.

Feel free to adjust the layer height, walls, infill and other print settings depending on your printer, material, chosen scale and personal preferences.

SCALING

You can scale the complete design to any size you prefer depending on your printer and available wall space.

IMPORTANT: Since this WallArt consists of 12 individual pieces, make sure to scale every piece by exactly the same percentage so that all hexagons still fit together correctly.

For detailed WallArt designs like this, the larger you print it, the better it usually looks!

A larger overall size makes the continent details and compass easier to see and gives the complete 12-piece installation a much stronger presence on the wall.

MOUNTING

I recommend arranging all 12 pieces on the floor or another flat surface first before mounting them to the wall.

This makes it easier to reproduce the correct honeycomb layout and maintain consistent spacing between the individual hexagons.

Small pieces of double-sided adhesive tape can then be used to securely attach each section to the wall.

This makes installation quick and easy without drilling or screws.

♥ SHOW YOUR MAKE!

If you print it, I would love to see your make! ♥

Feel free to share your filament choice, chosen size and how the complete 12-piece World Map looks on your wall.

Happy printing! ✈
