Due to the large amount of geometry, slicing the file takes a long time (up to approximately 20 minutes).

No brim or supports required.

The **Big Pin Art Fidget Toy** is a large version of the classic pin art toy, featuring a dense grid of individually movable pins that can be pushed back and forth to create shapes, patterns, and impressions.

The toy consists of a **rectangular base filled with individual movable pins**. Press your hand, fingers, or other objects against the surface and the pins move independently to reproduce their shape in 3D.

Each pin features an enlarged end that keeps it captured inside the base, allowing it to slide freely forward and backward without falling out.
