This stops you losing the USB cap for your Steam frame VR dongle when it is plugged into your PC

To install push fit onto the top of the dongle and it should hold itself on. Print files are in correct orientation and should be printed in strong, heat resistant filament such as ABS or ASA, although can be done in any filament with above a 60°C HDT due to the dongle getting quite warm during use.

(pictures are in Overture Olive Green ASA with 0.2 layer height, 2 walls and 15% infill)

No supports are needed
