Skull Ghost – LED Tea Light Holder

A little spooky, a little mysterious, and clearly attached to its favorite skull! This sheet ghost holds a detailed skull in both hands, bringing a darker Halloween touch to the collection.

Its hollow body fits over an LED tea light, letting a warm glow shine through the ghost's open eyes. Display it on a desk, bookshelf, or mantel, or pair it with the other ghosts for your own haunted lineup.

White or light-colored filament works well for the glowing effect. Light transmission will vary with filament, wall thickness, and LED brightness.

- Use battery-powered LED tea lights only—never real candles.
- Check the bottom opening against your tea light before printing or resizing.
