Meet the Articulated Skeleton Shark – a spooky print-in-place shark created especially for Halloween!

This flexi shark features a dark body with exposed skeletal-style details running through the fins, spine and tail, giving it a unique undead look while keeping the model fully articulated and fun to move.

Perfect as a Halloween decoration, fidget toy, desk companion or creepy gift for shark fans.

Features:

Fully articulated body

Print in place

No assembly required

No supports required

Detailed skeleton-inspired design

Great Halloween decoration or fidget

Designed for multicolor printing

Also works great in a one color

For best results, make sure your build plate is clean and properly prepared before printing.

If you enjoy the model, is greatly appreciated and helps me create more articulated animals!
