updated 11. 10. 2026 | published 11. 10. 2026

Summary

A single-piece stand to store your Steam Frame + Controllers. Works with or without the Ergonomic Kit & Arcturus Camera

[Gadgets](#) > [Virtual Reality](#)

Tags: [steam](#) [headset](#) [vr](#) [steamframe](#)

Stores your Steam Frame in a shaped tray, and both controllers drop into cradles in the middle, so the head strap wraps around them. The whole kit ends up in one compact bundle that takes about as much desk space as the headset alone.

Split version available for small print beds, the battery pack holder clips to the main body

Features

- Holds the headset **and both Steam Frame Controllers**
- Works with Valve's **Ergonomic Kit** top strap and controller straps
- Fits the **Arcturus camera** add-on
- **Single part** version for printers with a 250*250 bed or larger
- **Split version** version for 180*180 bed

Printing

- **MK4S:** Single part version fits, rotated diagonally on the bed. The included 3MF is already set up that way. Print time is about 3 h 54 m with default settings.
- **Core One:** about 3 h 28 m with default settings.
- **Prusa Mini:** Use the split version, 2 prints - roughly 4 h 19 m for part 1 and 1 h 8 m for part 2
- PLA, 0.2 mm layers, 15% infill, no supports, about 140 g
- My own print used a 0.5 mm nozzle at 0.25 mm layers on a Voron 2.4: 154 g, 3 h 18 m

Designed in Onshape (STEP included). Remixes welcome.
Fan-made accessory, not affiliated with or endorsed by Valve.
