Summary

Simple, lightweight sewing buttons in six different sizes. Easy to print and useful whenever you lose a button!

[Costumes & Accessories](#) > [Other Costume Accessories](#)

I made these simple sewing buttons because losing a button from your clothes happens sometimes. Instead of looking for a matching replacement, you can simply print a new one.

The set includes six sizes:

- **5 mm × 1 mm**
- **10 mm × 1.5 mm**
- **15 mm × 2 mm**
- **20 mm × 2.5 mm**
- **25 mm × 3 mm**
- **30 mm × 3.5 mm**

The height increases by 0.5 mm for every 5 mm increase in diameter. All versions have four holes for sewing.

They are quick to print and can be made in different colors to match your clothes. A small and simple print, but something that can be surprisingly useful when you need it.

Originally designed by me in Tinkercad.
Printed on my Prusa MINI+.
