My goal was once again to make this replica **realistic as pissible** so it could be used as prop for Vietnam war reenactment and also as a Airsoft gun and I think I came up with the best possible solution for both of the roles.

Launcher is externally based on the G&P Airsoft replica but all of the parts were simplified for better printing and to make them more durable for Airsoft use. Model comes as a **precut for smaller printers** and also as a full no cut model. **Handguard is only compatible with the realspec hanguard nut** so it wont fit on cheap CYMA or JG Works guns but it does fit fine on GBBR and E&C replicas. **Launcher it self should fit on any replica just fine.**

Assembly:

All screws goes directly in to the plastick and glue is just for the precut two pieces barrel. For assembly you are gonna need:

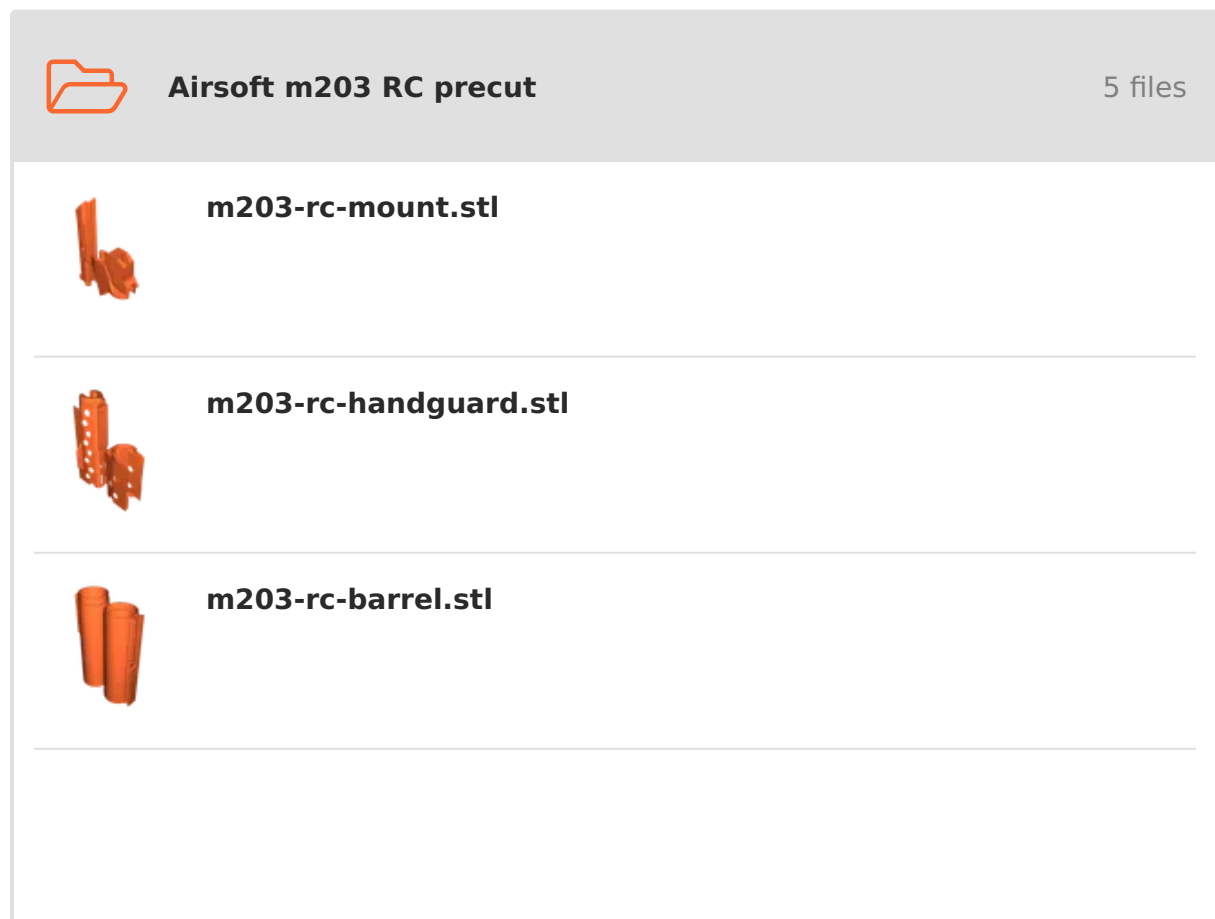

- 1x M3x29mm screw
- 4x M3x5mm screw - cut to 3mm
- 5x M3x10mm screw
- 2x 3x28 pin
- 2x 3x16mm pin
- 5x M4x12mm screw
- 2x M4x5mm scre
- 1x 13x18mm spring - is the same one as the AEG motor spring
- 2x pen spring

For the sight base and launcher mount piece you should use a small head screws.

Let me please know on any problems you are gonna have with my launcher so I can fix them thanks :)

Dont forget to share your prints with me :)
