Summary

Another drill or impact driver hanger

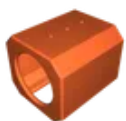

[Household](#) > [Garage](#)

A under-mount tool holder designed for DeWalt 20V cordless tools and likely compatible with most others.

The holder supports tools either hanging by the battery rails or standing upright. A rear pass-through opening provides clearance for longer tools and attachments, allowing a wide range of tools to fit in a compact footprint.

Designed for PLA, though PETG is recommended for higher-temperature environments. Thick walls help minimize flex under heavier loads.
