Halloween Cat & Bat Door Frame Wall Art

Add a playful spooky detail to your home with this **Halloween Cat & Bat Door Frame Wall Art!**

The design features a curious cat sitting on top of a door frame and looking up at a flying bat. The simple silhouette style makes it instantly recognizable while keeping the decoration clean, elegant and easy to combine with other Halloween décor.

What makes this design especially fun is the way the cat appears to be **sitting directly on the door frame**, almost as if it has spotted the bat flying above it.

It is a great little Halloween detail that can turn an otherwise empty doorway into something much more interesting.

It looks great in:

- Above door frames
- Halloween decorations
- Cat lover rooms
- Spooky seasonal setups
- Entryways
- Hallways
- Gaming rooms
- Witchy interiors
- Gothic home décor
- Halloween party decorations

I personally recommend printing the model in **matte black PLA**. The dark silhouette creates a beautiful contrast against light walls and white door frames and gives the design that classic Halloween look.

Combine it with pumpkins, orange lights, autumn leaves or candles and it fits perfectly into a cozy Halloween setup.

Features

- Curious cat silhouette
- Separate flying bat detail
- Perfect Halloween decoration
- Designed beautifully for door frame placement
- Clean silhouette style
- Easy FDM print
- No supports required
- Lightweight wall decoration
- Approximately **3 mm thick**
- Easily scalable
- Great in black, orange, purple or glow filament

Scaling

The model can easily be scaled depending on the width of your door frame and the available wall space.

For the best result, keep the **X and Y dimensions proportional** when resizing the cat and bat.

You can also position the bat freely above the cat, allowing you to create your own little Halloween scene.

Printing the model larger can make the silhouette even more noticeable from across the room.

Recommended Print Settings

Material: PLA

Layer Height: 0.28 mm

Walls: 2

Infill: 15%

Infill Pattern: Rectilinear

Supports: None

Brim: Usually not required

Model Thickness: 3 mm

Orientation: Flat on the build plate

PLA is ideal for this type of Wall Art because it prints easily, remains lightweight and produces a clean decorative surface.

Print Tip

For a clean finish, make sure your first layer is well calibrated, especially around the thinner areas such as the cat's ears, tail and the bat's wings.

A textured PEI plate can also create a beautiful subtle texture on the visible surface.

For mounting, small pieces of **double sided tape** work very well. This allows you to position the cat directly above the door frame and place the bat wherever you like.

You can even rotate or reposition the bat slightly to create a more playful composition.

Add a few pumpkins, warm lights or autumn decorations nearby and the whole doorway becomes a small Halloween scene.

Happy printing and **Happy Halloween!**
