Hanging Spider Web Halloween Wall Art

Add a classic spooky detail to your Halloween setup with this **Hanging Spider Web Wall Art!**

The design features a stylized spider web at the top with a large spider hanging underneath from a single strand.

It is simple, bold and instantly recognizable, making it a great decoration for anyone who loves classic Halloween designs.

Thanks to its vertical shape, the model works especially well above or beside **doors, shelves, mirrors and wall decorations**.

It looks great in:

- Halloween decorations
- Spooky wall displays
- Doorways and door frames
- Entryways
- Halloween corners
- Gaming rooms
- Witchy interiors
- Gothic rooms
- Haunted house setups
- Halloween party decorations

I personally recommend printing it in **matte black PLA**. The dark spider and web create a beautiful contrast against light walls and give the model that classic Halloween silhouette look.

It can also look great in **purple, orange, white or glow in the dark filament** if you want something a little different.

Features

- Large hanging spider
- Decorative spider web
- Classic Halloween design
- Clean silhouette style
- Easy FDM print
- No supports required
- Approximately **3 mm thick**
- Lightweight wall decoration
- Easily scalable
- Perfect for different Halloween filament colors

Scaling

The model can easily be scaled up or down depending on the space available and the size of your printer.

For the best result, keep the **X and Y dimensions proportional** so the original spider and web design remains unchanged.

Printing it larger can make the spider even more impressive, especially when used above a doorway or as part of a larger Halloween wall display.

You can also slightly increase the Z height if you prefer a thicker and more rigid decoration.

Recommended Print Settings

Material: PLA

Layer Height: 0.28 mm

Walls: 2

Infill: 15%

Infill Pattern: Rectilinear

Supports: None

Brim: Usually not required

Model Thickness: 3 mm

Orientation: Flat on the build plate

PLA is perfect for this kind of Wall Art because it is lightweight, easy to print and creates a clean decorative surface.

Print Tip

Make sure your first layer is nicely calibrated, especially around the thinner areas of the **spider legs, web strands and hanging line**.

A textured PEI build plate can also give the visible side a beautiful subtle surface texture.

For mounting, I recommend small pieces of **double sided tape** or removable mounting tape.

The design looks especially good on a bright wall combined with **pumpkins, candles, autumn leaves, bats or artificial spider webs**.

Because the spider hangs below the web, it also works beautifully as a decoration above a **door frame, shelf or mirror**.

Happy printing and **Happy Halloween!**
