Summary

Print-in-place hermit crab with a separated shell to dwell.

[World & Scans](#) > [Animals](#)

Tags: [articulated](#) [flexi](#) [crab](#) [hermitcrab](#)

A model of articulated hermit crab with movable limbs, claws, body sections, etc.

The print-in-place crab and the spiral shell are separated. There are snap-fit structures on parts themselves for assembly.

Supports are not required. The shell part may better have some for stableness.
